

We, Local Union 633 follow a policy that set forth the fundamental principles underlying all that we do in the UA. These are words we intend to live by.

The UA Standard for Excellence policy not only outlines the obligations of UA members on the job; it also spells out the obligations of our signatory contractors as well. In this way, we are making it clear to all parties—including construction owners—that we are dedicated to doing the best job possible.

This policy represents the best workplace ethics and it can help to ensure success as a professional UA tradesperson. We believe that the United Association is, without a doubt, the best union in the building trades.
